

# TRADE PREP PROGRAM

division of National Education Developers, LLC

The goal -- to introduce future workers to the construction industry, including high school students and adults in transition.

Trade Prep offers industry-recognized courses accredited by the National Center for Construction Education and Research (NCCER).

Trade Prep introduces masonry, plumbing, electrical, carpentry, heating, A/C, & welding. Completed courses qualify for high school credit; if desired, more trade prep is eligible for college credit, too.

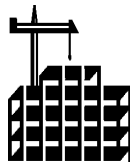

National Educational Developers delivers the trade preparation programs where we are invited. Contact us with your ideas.

## Benefits to Students

- \_\_\_ Students become eligible to have their credentials entered into the National Registry of the NCCER, acceptable nationwide.
- \_\_\_ Students work in the industry of their choice.
- \_\_\_ Apprentices do not **PAY** for their education, they **GET PAID** for learning!
- \_\_\_ We bring the courses to you! Courses are taught by NCCER-certified instructors, experienced in the trades, delivering excellence.
- \_\_\_ Courses are eligible to earn high school credit from a fully accredited private high school (college credit is also available).
- \_\_\_ Hands-on training, practice, and classroom work
- \_\_\_ The student knows that the effort, the work, and the goal of this education is practical and useful -- and it is **PORTABLE** -- there is work everywhere!

## Benefits to Families

- \_\_\_ Knowing your student has an honorable, valuable trade
- \_\_\_ Knowing that the trades will always be needed; therefore, your student will always have employment opportunities
- \_\_\_ Understanding that without college, this young man or woman will have a sustainable career to support the lifestyle and family of the future.
- \_\_\_ Families do not **pay out** money for expensive college courses; rather, the apprentices will **earn as they learn**.
- \_\_\_ If college becomes a goal, the student will support his own education.
- \_\_\_ Less than 50% of college graduates actually work in the professions of their college degree; yet more than 95% of trained tradesmen work in their professions.
- \_\_\_ The student will acquire practical, usable skills that may be used to enhance his or her own home or buildings.

# TRADE PREP

## Outcomes

- 💰 Learning while earning \$8-10/hr. to start
- 💰 Earn trade skills AND high school credit
- 💰 Earn trade skills AND college credits, too
- 💰 Find work anywhere

## Program

- 👁️ Learn industry-standards from accredited materials
- 👁️ Complete "core curriculum" required for all trades
- 👁️ Get hands-on training from masters in their trades
- 👁️ Classroom time taught by certified instructors

## Features

- 🚩 Students as young as 16 can begin Trade Prep
- 🚩 Job opportunities arranged with local contractors
- 🚩 High-demand workforce is eager for your skills
- 🚩 Be exposed to multiple trades, then pick a specialty

## Details

- 🎯 "Core Curriculum" takes 102 hours to complete
- 🎯 Completion makes the student eligible for entry into the National Registry of the NCCER, validating your readiness and training for nationwide employment.
- 🎯 Specific, extensive training is available in individual trades after the "Core" is completed.
- 🎯 OSHA 10-hour cards can be earned in just 2 days.
- 🎯 CPR / First Responder certifications also available
- 🎯 Each student will be guided and prepare a "working resume" for use when applying for a job.
